DETAILED ACTION

This supplemental amendment is responsive to the letter filed on June 18, 2005 entitled, "Request for Completed Notice of Allowability."

Allowable Subject Matter

Claims 1- 11 allowed.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with James A. LaBarre on April 11, 2005.

The specification and claims are hereby replaced with the following attachment: "Examiner's Amendment to the Specification" as of November 28, 2005.

Remarks

The examiner's amendment merely corrects for pagation errors, grammar and spelling mistakes. The scope has not been changed.

Pertinent Art Cited

The following journal article reveals the current state of the art:
Huang (Journal of the Acoustical Society of America, Nov 2002, Vol. 112, No. 5, pp.2014-2025) teaches a method of designing a chamber for attachment of a duct to reduce noise in said duct, said chamber having a peripheral chamber height h_c to

reduce noise in a duct having a height h by, said duct being separated from said chamber by a membrane having a tension T and membrane length L , including the steps of (Method of Solution, Paragraph 1, pg. 2015):

determining the radiation pressure acting on the upper surface of the membrane facing away from the chamber, p_{+rad} caused by a unit modal amplitude (Radiation and cavity reflection impedances, Paragraph 2, pg. 2016);

determining the radiation pressure acting on the lower surface of the membrane facing towards the chamber p_{-rad} caused by a unit modal amplitude (Radiation and cavity reflection impedances, Paragraph 2, pg. 2016);

determining the radiation pressure by reflection of the radiated waves into the cavity by the walls of the chamber, p_{-ref} caused by a unit modal amplitude.

Reason for Allowance

The following is an examiner's statement of reasons for allowance: Regarding Claim 1:

The primary reason for allowance of claim 1 is the inclusion of the limitations of the varying wave frequency f to calculate transmission loss TL for different f , and determine a frequency range f_1 to f_2 from the transmission loss TL within f_1 to f_2 is higher than or equal to a threshold transmission loss TL_{cr} . It is these features found in the claim, as they are claimed in the combination that has not been found, taught, or suggested by prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
